EDUCATION

ERASMUS UNIVERSITY ROTTERDAM

1988 – 1995 Economics

CAROLUS BORROMEUS COLLEGE

1982-1988 VWO (Atheneum)

EXPERIENCE

2020   WORDPRESS DEVELOPER

- Create some Wordpress sites
1. www.psvschoonspringen.nl
2. www.fortuna-consultancy.com
3. www.de16.nl
4. www.larsmennen.nl

2013   PREVENDA, CAMELOT, HOD

- Take care of unoccupied property.

2012   KPN

- A Dutch agency was looking for a temporary candidate with as well an Oracle as a financial background, to join their client for assistance with their administration of the Oracle GL module. Besides that I also assisted with the setup of the Financial system accounting Hub.

2011   REED ELSEVIER

- Through an agency I joined Reed Elsevier to assist them with the necessary steps to setup OTL (Oracle time and labor). This meant: the creation of the employee, setup the employee as an Orale user and assign a cost rate to the employee in Orale PA (Project accounting).

2011   ALLSEAS ENGINEERING

- I joined Allseas engineering for the second time because they were looking for some extra headcount with regard to the support and further development of their Oracle system.

2008   LINKSYS-CISCO

- I joined Linksys-Cisco initially as a temporary worker through Atos Origin. Linksys wanted to extend their Oracle support department to a global operation. While I was in the US my manager offered me to join Linksys on a permanent basis, which I accepted. Within the EMEA region I was responsible for the Oracle support. The work consisted generally of the remote installation of Oracle Discoverer and some user support in Denmark. Also assisted with the testing of the moving of the warehouse to the Czech Republic.

2005 MFSW

- I worked for two clients of MFSW. The first assignment I got was acting as a DBA for UPC broadcasting, here I developed some alerts which were necessary to be compliant with regard to the Sarbanes Oxley act.
- The second assignment I did was to help the ministry of Agriculture with keeping in sync the development and production environment. Also learned to work with Oracle Quality.

2003 DPA FINANCIAL PEOPLE

- At DPA financial people I developed operational, financial and commercial reports within the Oracle EBS system. One of the (important) modules used was Oracle PA.
- The reports showed revenue per site and per employee. Futhermore I developed some reports with regard to the achievements per sales-manager. These reports showed revenue generated and revenue expected so that people could see if the sales-people were on target..

2002 DELOITTE & TOUCHE

- I was asked to come to work for Deloitte while I was working in the Dutch Carribean for SQL-integrator. At that time I found it inappropriate to join them, but later on I thought this would be a good career-move.
- At Deloitte I learned to work with JD-edwards (distribution) besides my Oracle (financials) knowledge. I did one assignment for the city of Tilburg and one for the ministry of Flemmish affairs in Bruxelles.
